

Community Health and Health Promotion (COMH)

Module 3: Health Promotion Principles

Health Promotion and Prevention

Lesson Notes

KMVTECHUG

Version: 2026

Health Promotion

Enables people to increase control over health through skills, environments, and policy.

Action Areas

Policy, supportive environments, community action, personal skills, reoriented services.

Prevention Levels

Primary stops disease; secondary finds early; tertiary limits disability.

Reflect: Give one primary prevention example used in Uganda.

Closing

Next: behaviour change and enabling environments.
