

Community Health and Health Promotion (COMH)

Module 4: Assessment and Participation

Knowing and Assessing a Community

Lesson Notes

KMVTECHUG

Version: 2026

Knowing a Community

Learn who lives there, priorities, and existing structures before intervening.

Needs Assessment

Use observation, conversations, facility data, and reports. Keep tools short and respectful.

Local Data

Registers show disease, age, and season patterns when interpreted carefully.

Reflect: What data source could you check at a nearby HC III?

Closing

Next: participation, stakeholders, planning.
