

First Aid and Basic Emergency Care (FAEC)

Module 3: Life-Threatening Emergencies

Choking and CPR Awareness

Lesson Notes

KMVTECHUG

Version: 2026

Choking

Mild: encourage cough. Severe: help, back blows, thrusts if trained.

Falls

Unresponsive: call help, CPR if trained. Visible objects only.

CPR

Awareness only. Get certified practical training.

Reflect: *Where could you take a practical course?*

Closing

Next: bleeding and shock.
