

First Aid and Basic Emergency Care (FAEC)

Module 5: Medical Emergencies

Fainting, Seizures and Asthma

Lesson Notes

KMVTECHUG

Version: 2026

Fainting

Lie down, legs up if safe, loosen clothes, rise slowly.

Seizures

Protect head. No restraint. No objects in mouth. Time the event.

Asthma

Upright. Prescribed reliever. Help if not improving.

Reflect: *What must never go in the mouth during a seizure?*

Closing

Next: allergy, diabetes, referral.
