

Family Medicine and Primary Care (FAMMED)

Module 3: Common Presentations

Undifferentiated Illness and Infections

Lesson Notes

KMVTECHUG

Version: 2026

Undifferentiated

Symptoms before a clear label; sort urgency from mild illness.

Infections

Use guidelines; avoid unnecessary antibiotics; know danger signs.

Pain

Know red flags for chest, abdomen, and other pain presentations.

Reflect: *Why is antibiotic stewardship part of primary care?*

Closing

Next: maternal-child, chronic, mental health contacts.
