

Family Medicine and Primary Care (FAMMED)

Module 4: Continuity Prevention and Referral

Registers and Urgency

Lesson Notes

KMVTECHUG

Version: 2026

Registers

Track chronic patients for planned recall.

Limited Tests

History and exam carry more weight; safety-net uncertainty.

Red Flags

Severe infection, breathing difficulty, bleeding, altered consciousness, obstetric emergency, trauma.

Reflect: Name two red flags that need same-day escalation.

Closing

Module 5: family and community context.
