

Introduction to Epidemiology (INTEPI)

Module 3: Study Designs

Cross-Sectional and Case-Control

Lesson Notes

KMVTECHUG

Version: 2026

Overview

Selection, assignment, time direction differ.

Cross-Sectional

Snapshot; prevalence; limited sequence.

Case-Control

Cases and controls; look back; efficient for rare outcomes.

Reflect: *Why are case-control studies useful in outbreaks?*

Closing

Next: cohort, trials, choosing.
