

Introduction to Epidemiology (INTEPI)

Module 4: Association and Bias

Bias, Chance and Appraisal

Lesson Notes

KMVTECHUG

Version: 2026

Bias

Selection and information bias threaten validity.

Chance

Random error; confidence intervals; significance vs importance.

Critical Reading

Question, population, measurement, bias, alternatives, local fit.

Reflect: *What is one question you will always ask of a new study?*

Closing

Module 5: outbreaks and surveillance.
