

Introduction to Epidemiology (INTEPI)

Module 5: Outbreaks and Surveillance

Definitions, Curves and Control

Lesson Notes

KMVTECHUG

Version: 2026

Case Definitions and Line Lists

Comparable counts; organised case data.

Curves and Maps

Time and place patterns guide hypotheses.

Control and Communication

Target source, transmission, or susceptibility; honest messages.

Reflect: *What does a sharp epidemic peak often suggest?*

Closing

Module 6: practice and application.
