

Introduction to Epidemiology (INTEPI)

Module 6: Practice and Application

Errors, Teams and Takeaways

Lesson Notes

KMVTECHUG

Version: 2026

Common Errors

Missing denominators; mixing measures; weak causal claims; ignoring bias.

Teams

Clarify questions; involve data and lab partners.

Takeaways

Populations; denominators; design fit; bias and chance; surveillance for action; outbreak steps; local use; ethics.

Reflect: Which error will you watch for most carefully?

Closing

You completed INTEPI.
