

Infection Prevention and Control (IPC1)

Module 2: Hand Hygiene

Why Hands and Key Moments

Lesson Notes

KMVTECHUG

Version: 2026

Why Hands

Hands are the most common vehicle for microbes in care settings.

Key Moments

Before patient contact, before aseptic tasks, after fluid risk, after patient, after surroundings.

Soap vs Alcohol Rub

Alcohol rub when not visibly dirty. Soap and water when soiled.

Reflect: List the five moment types in your own words.

Closing

Next: technique and barriers.
