

Infection Prevention and Control (IPC1)

Module 3: PPE and Standard Precautions

Safe Use and Injections

Lesson Notes

KMVTECHUG

Version: 2026

Don and Doff

Sequence matters. Contaminated surfaces can infect you during removal.

Respiratory Hygiene

Cover coughs; dispose tissues; clean hands; mask symptomatic patients when appropriate.

Safe Injections

One needle, one syringe, one patient. Immediate sharps disposal.

Reflect: *Why is two-handed recapping unsafe?*

Closing

Module 4: sharps, waste, environment.
