

Mental Health Interventions at a Workplace (MHWP)

Module 2: Risks and Presentations

Hazards, Stress and Burnout

Lesson Notes

KMVTECHUG

Version: 2026

Psychosocial Hazards

Workload, low control, conflict, poor support, bullying, insecurity, violence exposure.

Stress and Burnout

Demands vs resources; exhaustion, cynicism, reduced efficacy; fatigue and safety.

Presentations

Notice mood, withdrawal, performance changes - do not over-diagnose as non-clinician.

Reflect: Which hazard is most common in your sector?

Closing

Next: substance, trauma, Uganda sectors.
