

Maternal, Newborn and Child Health (MNCH)

Module 3: Labour Birth and Newborn

Immediate Newborn Care

Lesson Notes

KMVTECHUG

Version: 2026

Immediate Care

Dry, warm, assess breathing, skin-to-skin when appropriate, early breastfeeding when stable.

Help to Breathe

Some newborns need resuscitation. Seek certified practical training.

Cord and Warmth

Follow national cord care guidance. Prevent hypothermia throughout the warm chain.

Reflect: *What are the first actions for a wet newborn at birth?*

Closing

Module 4: postnatal care.
