

Non-Communicable Diseases in Primary Care (NCDPC)

Module 1: Foundations of NCDs

What are NCDs

Lesson Notes

KMVTECHUG

Version: 2026

Definition

NCDs are long-term conditions such as heart disease, diabetes, chronic lung disease, and many cancers.

Uganda Context

Double burden: infections plus rising NCDs. Early primary care detection prevents costly complications.

Risk Factors

Modifiable: tobacco, harmful alcohol, diet, inactivity, pollution. Focus on what can change.

Reflect: Which modifiable risk is most common in your community?

Closing

Next: primary care role, prevention levels, myths.
