

Non-Communicable Diseases in Primary Care (NCDPC)

Module 3: Diabetes in Primary Care

Diabetes Basics

Lesson Notes

KMVTECHUG

Version: 2026

What it is

High blood glucose from insulin production or action problems. Type 2 common in adults.

Detection

Many have few symptoms. Screen high-risk adults. Classic: thirst, polyuria, weight loss, fatigue.

Monitoring

Facility and home checks where available. Know hypoglycaemia signs.

Reflect: *Why is silent type 2 diabetes dangerous?*

Closing

Next: lifestyle, complications, foot care.
