

Reproductive and Urinary Disorders (REPURO)

Module 2: Urinary Tract Conditions

Haematuria, Stones and Kidneys

Lesson Notes

KMVTECHUG

Version: 2026

Haematuria

Visible or dipstick blood needs a structured pathway - not automatic dismissal.

Stones

Colicky flank pain; urgent if fever or retention.

Kidneys

Link recurrent issues and chronic disease to long-term kidney protection.

Reflect: *Why take haematuria seriously in older adults?*

Closing

Module 3: male reproductive health.
