

Reproductive and Urinary Disorders (REPURO)

Module 3: Male Reproductive Health

Sexual Function and Fertility

Lesson Notes

KMVTECHUG

Version: 2026

Erectile Difficulty

May signal vascular disease or diabetes; stay within prescribing authority.

Fertility

Assess both partners; avoid single-partner blame.

Prevention

Safer sex, STI care, alcohol, tobacco, chronic disease control.

Reflect: *How can erectile symptoms open a cardiovascular risk conversation?*

Closing

Module 4: female reproductive health.
