

AI Prompting (AIPROMPT)

Module 2: Clear Instructions and Roles

Instruction Clarity and Roles

Lesson Notes

KMVTECHUG

Version: 2026

Instruction Clarity

Instruction clarity means saying exactly what to do: summarise, compare, list, rewrite, quiz me, outline.

Use action verbs. Prefer one main task per prompt when you are starting out.

Role Prompting

Role prompting assigns a helpful stance, such as a patient tutor for Year 1 biology or an editor who fixes grammar without changing meaning.

Roles guide tone and depth. They do not make the AI a real professional with legal responsibility.

Audience and Tone

Name the audience: secondary student, first-year undergrad, workplace email to a supervisor.

Name the tone: simple, formal, neutral, encouraging. Mismatch causes answers that feel wrong even when facts are fine.

Reflect: Write a role + audience line for a prompt that explains mobile money fees to a new user.

Closing

Next lesson: task framing and campus examples.
