

AI Prompting (AIPROMPT)

Module 3: Context, Examples and Constraints

Formats and Local Context

Lesson Notes

KMVTECHUG

Version: 2026

Output Formats

Ask for the shape you need: checklist, comparison table, study plan by day, short oral presentation script.

Length and Structure

State word limits or section counts. Long unrestricted answers are harder to review and easier to misuse.

Local Context Tips

Add: Uganda or East Africa, university level, language preference such as simple English, and use local examples where possible.

Reflect: *Why might a prompt without country context give weaker examples for a Ugandan student?*

Closing

Module 4 covers step-by-step reasoning and multi-step workflows.
