

AI Prompting (AIPROMPT)

Module 5: Fixing Bad Outputs

Iteration and Safety

Lesson Notes

KMVTECHUG

Version: 2026

Iteration Loop

Prompt, read, identify one problem, fix prompt, try again. Iteration is normal professional practice, not failure.

Evaluating Answers

Evaluation questions: Does it answer the ask? Is the level right? Any invented specifics? Does it follow format? What must I verify?

Safety and Scope

Do not use prompting for harm, cheating, or medical or legal decisions without qualified professionals. Stay within safe, honest scope.

Reflect: Which evaluation question will you use first on your next AI answer?

Closing

Module 6 applies prompting to study, work, and ethics.
