

AI Prompting (AIPROMPT)

Module 6: Study, Work and Ethics

Study, Work and Academic Honesty

Lesson Notes

KMVTECHUG

Version: 2026

Prompting for Study

Study uses: explain concepts, generate practice questions, compare theories, build revision plans. Always return to your notes and required readings.

Work and Communication

Work uses: draft emails, meeting agendas, polite follow-ups, summarise long notes. Keep human review before sending professional messages.

Academic Honesty

Follow institutional rules. Disclose when required. Do not submit AI text as pure original work when that is forbidden. Learning is the goal.

Reflect: *What does your programme or university currently say about AI use in coursework?*

Closing

Final lesson: Uganda work context, next skills, and takeaways.
