

Introduction to Cybersecurity (CYBERSEC)

Module 4: Safe Browsing and Email

Safe Browsing and Downloads

Lesson Notes

KMVTECHUG

Version: 2026

Safe Browsing Habits

Type known addresses or use trusted bookmarks. Be careful with lookalike search results.

HTTPS and Fake Sites

HTTPS encrypts traffic in transit but does not prove the organisation is real. Check domain spelling.

Downloads and Attachments

Avoid unexpected attachments and cracked software. Prefer official app stores.

Reflect: *How do you decide if a download source is trustworthy?*

Closing

Next: email safety, app permissions, and public Wi-Fi.
