

Introduction to Cybersecurity (CYBERSEC)

Module 5: Data Privacy and Backups

Personal Data and Backups

Lesson Notes

KMVTECHUG

Version: 2026

Personal Data

Personal data includes identity details, contacts, location, financial information, and private messages.

Sharing and Oversharing

Oversharing can enable targeted scams. Limit public personal details.

Device and Cloud Backups

Backups protect against loss, theft, and ransomware. Protect cloud accounts with strong controls.

Reflect: *Is your phone backup current and is the cloud account using MFA?*

Closing

Next: lost phone scenarios, privacy settings, and campus data rules.
