

Introduction to Cybersecurity (CYBERSEC)

Module 6: Response and Next Steps

If You Are Compromised

Lesson Notes

KMVTECHUG

Version: 2026

If You Are Compromised

Change passwords from a safe device, revoke sessions, enable MFA, warn contacts if needed, and contact financial providers if money is at risk.

Reporting and Help

Report serious fraud to providers and authorities. Use campus ICT channels for institutional accounts.

Building Habits

Habits beat panic: unique passwords, MFA, careful links, updates, backups, and skepticism toward urgency.

Reflect: Write a 5-item personal security checklist for this month.

Closing

Final lesson: careers, ethical hacking path, and takeaways.
